

Original HIKO®

Plastic feeding bucket TK 13

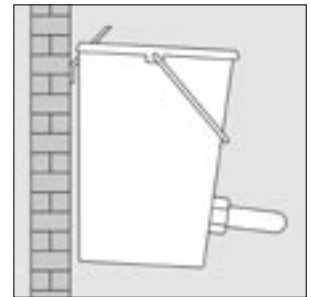

Natural cold and warm feeders for calves.

Well suited for all types of feeders (inside or outside feeders).

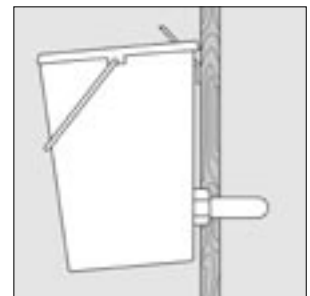

- Empty position provided
- Hygienic
- Light and robust
- Stackable
- Cost-effective
- 13 liter volume

You save time:

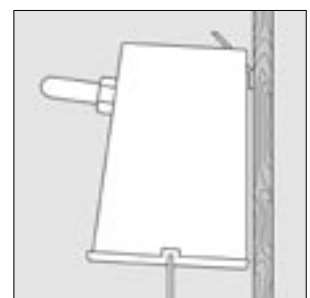

- The feeding bucket drains out in the empty position.
- This keeps it clean.
- Has a fixed location.
- Is simply turned over and can be filled at the feeding location.

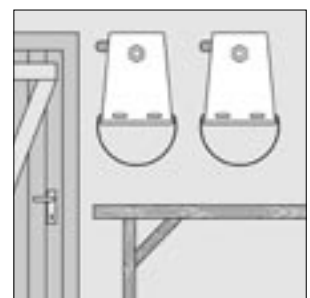

As inside feeder

As outside feeder

Empty Position

Or with separate mounting bracket

- Made of an environmentally friendly material (without regeneration)
- Robust mounting slots
- Imprinted liter scale on both sides
- Suspension slot in the bottom edge for various empty positions
- Slanted bucket bottom allows livestock to drink from the feeding bucket until it is empty!
- Mounting bracket, galvanized metal or plastic
- Resistant against formic acid
- Temperature resistant and elastic rubber teats made of natural rubber, cannot be pulled out by livestock
