

Original HIKO®

# Plastic feeding bucket TL 9

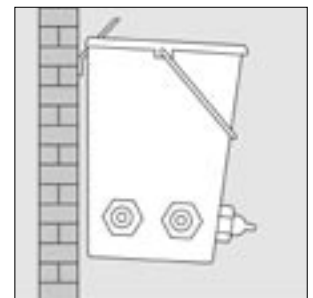

## Natural cold and warm feeders for lambs, goats and foals.

A natural and clean feeder  
is important for the livestock  
to thrive.

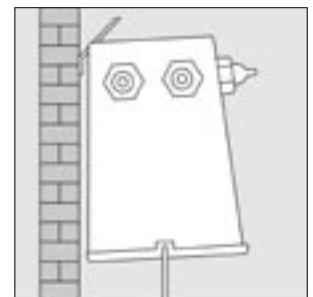

- Empty position provided
- Hygienic
- Light and robust
- Stackable
- Cost-effective
- 9 liter volume

### You save time:

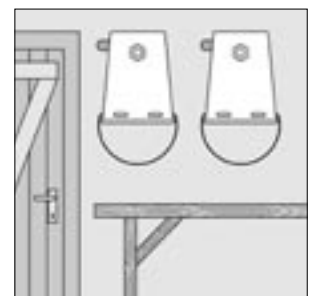

- The feeding bucket drains out in the empty position.
- This keeps it clean.
- Has a fixed location.
- Is simply turned over and can be filled at the feeding location.

With wall-mount

Empty Position

Or with separate  
mounting bracket

- Made of an environmentally friendly material (without regeneration)
- Robust mounting slots
- Imprinted liter scale on both sides
- Mounting slot on the back edge of the bottom for empty position
- Raised bottom edge to protect the teats and allow secure handling
- Arched bucket bottom allows livestock to drink from the feeding bucket until it is empty!
- Mounting bracket, galvanized metal or plastic
- Free of FCKW and PVC
- Resistant against formic acid
- Temperature resistant and elastic rubber teats made of natural rubber, cannot be pulled out by livestock
